📍 Kolkata, West Bengal

SUMMARY

Aspiring AI Engineer with hands-on experience in Machine Learning, NLP, Predictive Analytics, and scalable ML pipelines. Skilled in Python, Scikit-Learn, SQL, and data-driven experimentation, with experience building predictive models, evaluating model performance, and deploying AI solutions. Strong interest in applying AI and Machine Learning to real-world domains including finance, recommendation systems, and intelligent decision support.

EDUCATION

Academy of Technology	2022 – 2026
<i>Bachelor of Technology (Electrical Engineering), CGPA: 7.29 (Up to 7th Sem)</i>	<i>Hoogly, WB</i>

EXPERIENCE

Salesforce Developer Intern	May 2025 – July 2025
<i>SmartBridge (In collaboration with AICTE & Salesforce)</i>	<i>Remote</i>
- Engineered custom business logic using Apex and architected responsive, event-driven user interfaces with Lightning Web Components (LWC). - Automated complex organizational workflows by configuring Flow Builder and Process Automation tools to enhance operational efficiency. - Implemented robust Data Security models, including Role Hierarchies, Sharing Rules, and Profile-based permissions to ensure data integrity. - Attained the Apex Specialist Superbadge by solving real-world business scenarios involving asynchronous processing, triggers, and integration. - Configured custom objects, fields, and complex Object Relationships to optimize data architecture for scalable business solutions.	

PROJECTS

Customer Churn Analysis & Prediction | [GitHub](#) | *Excel, SQL, Power BI, Python, Power Query*

- Built an end-to-end Customer Churn pipeline covering data cleaning, EDA, and feature engineering.
- Developed classification models for churn prediction using ROC-AUC and F1-score to prioritize retention.
- Delivered business-ready visualizations in Power BI to translate model outputs into actionable recommendations.

Network Security Threat Detection | [GitHub](#) | *Python, Scikit-Learn, MLFlow, MongoDB, AWS*

- Built and deployed an end-to-end ML-based project identifying network threats by analyzing logs and applying rule-based detection.
- Implemented logic to surface anomalies (e.g., unusual ports, high-frequency requests) for faster incident response.
- Designed a modular, automated workflow for repeatable security assessments and monitoring.

Personalized Book Recommender | [GitHub](#) | *NLP, Python, Gradio, OpenAI*

- Developed a semantic search engine using NLP to suggest books based on user intent and emotional context.
- Engineered a custom Gradio dashboard for real-time visualization of recommendations and data insights.

TECHNICAL SKILLS

Programming : Python, Java
Data : SQL, Numpy, Pandas
ML/AI : Scikit-Learn, Matplotlib, Seaborn, Langchain, Transformers, NLP
Tools/Platform : Salesforce, Git, Github, Docker, AWS (EC2, IAM, S3)
Database : MySQL, MS SQL Server, NoSQL(MongoDB)
Tools : MS Excel, MS-Powerpoint, Power BI, VS Code, Cursor, SQL Server

ACHIEVEMENTS

Smart India Hackathon (SIH) 2024: Recognized among the Top 8 teams in the national competition.
Oracle Certified Associate: MySQL Implementation Certified Associate. [\[Verify\]](#)
Oracle Certified Professional: OCI Generative AI Professional. [\[Verify\]](#)
Oracle Certified Professional: OCI Data Science Professional. [\[Verify\]](#)
